Summary

Computer Science graduate with hands-on experience designing and implementing production-grade DevOps solutions using AWS, Terraform, GitHub Actions, Jenkins, Docker, Kubernetes, and Spring Boot. Skilled in Infrastructure as Code (IaC), CI/CD automation, containerization, cloud deployments, REST API development, and DevSecOps using SonarQube and Trivy. Passionate about building secure, scalable, and cloud-native software delivery platforms.

Technical Skills

Languages: Java, Python, SQL, Bash
Backend: Spring Boot, Spring Data JPA, REST APIs, Swagger/OpenAPI
Cloud: AWS (EC2, VPC, IAM, S3, ECR, Lambda, CloudFormation)
DevOps: Git, GitHub, GitHub Actions, Maven, Jenkins, Docker, Docker Compose, Kubernetes, Terraform
DevSecOps: SonarQube, Trivy
Testing: JUnit 5, Mockito, JaCoCo
Databases: MySQL
Operating Systems: Linux, Windows

Projects

Enterprise AWS DevOps Platform *Java, Spring Boot, AWS, Terraform, Docker, GitHub Actions, ECR*
🐙 GitHub Repository

- Designed and provisioned AWS infrastructure using Terraform, including a VPC, public/private subnets, route tables, NAT Gateway, Security Groups, IAM Roles, and EC2 instances.
- Built and containerized a Spring Boot REST API using Docker with multi-stage builds and immutable image tagging for consistent deployments.
- Implemented a GitHub Actions CI/CD pipeline to automate Maven builds, Docker image creation, Amazon ECR publishing, and zero-touch deployment to EC2.
- Enhanced deployment reliability through health checks, deployment validation, Docker cleanup, build caching, concurrency control, semantic versioning, and least-privilege GitHub Actions workflow permissions.
- Published comprehensive technical documentation and versioned the project using semantic releases (v1.0.0).

Production DevOps CI/CD Pipeline *Java, Spring Boot, Jenkins, Docker, Kubernetes, SonarQube, Trivy, MySQL*
🐙 GitHub Repository 🏗️ Architecture Diagram

- Designed and implemented a production-ready end-to-end CI/CD pipeline using Jenkins, automating source checkout, Maven build, testing, SonarQube analysis, Trivy security scanning, Docker image creation, and Kubernetes deployment.
- Developed a Spring Boot Employee Management REST API using Spring Data JPA, MySQL, Swagger/OpenAPI, Bean Validation, global exception handling, and Spring Boot Actuator.
- Containerized the application using Docker and deployed it on Kubernetes with Deployments, Services, ConfigMaps, Secrets, Persistent Volume Claims (PVCs), and readiness, liveness, and startup probes.
- Implemented automated testing using JUnit 5 and JaCoCo while creating comprehensive project documentation including architecture diagrams, deployment guides, CI/CD workflow, API documentation, and project screenshots.

Internship

DevOps Intern, Elevate Labs *Sep 2025 – Nov 2025 (Remote)*

- Built and automated CI/CD pipelines using Jenkins and GitHub.
- Containerized applications using Docker and deployed workloads on Kubernetes.
- Assisted with cloud deployments, Infrastructure as Code, and monitoring using AWS, Terraform, Prometheus, and Grafana.

Cloud Virtual Internship, AICTE Eduskills *Jul 2024 – Sep 2024 (Remote)*

- Completed AWS Academy Cloud Foundations and Cloud Architecting curriculum.
- Gained hands-on experience with EC2, IAM, S3, and VPC services.

Education

Bachelor of Technology (B.Tech) *May 2025*
Computer Science and Design **CGPA: 7.73**
SRKR Engineering College, Bhimavaram

Certifications

- AWS Academy Cloud Foundations (2024)
- AWS Academy Cloud Architecting (2024)
- Cloud Virtual Internship Certificate (AICTE)
